

Méthode Cap Classique

Champagne - name derived from the Latin term campania - originally used to describe the rolling countryside just north of Rome. Champagne, with its two towns Reims and Eperney, was the first region to make sparkling wine in any quantity and historically the name Champagne became synonymous with the finest. Wine made in this style in South Africa is termed 'Méthode Cap Classique'

Sauvignon Blanc

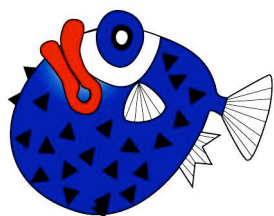

The name Sauvignon comes from the French *sauvage*, meaning wild. It is a fitting name for a vine, which left to its own devices, would grow with riotous abandon. Riotous can also describe Sauvignon blanc flavours, which include straw, hay, grass and meadow. Sauvignon Blanc is taut, lithe and herbal with a keen stiletto of acidity that vibrates through the centre of the vine.

Cabernet Sauvignon

This is the most well known black grape variety in the world. The grapes are high in tannins, so Cabernet Sauvignon wines age well (especially if barrel matured), but need time to mature. At best, the wines are rich in colour, aroma and depth, and in time have a long lasting flavour. Benchmark examples of this variety have plenty of great aromas such as cassis, blackcurrant, liquorice, leather, small forest berries and cedar.

Pinotage

Deep ruby to plum centres is what you would find in a glass of this all South African grape cultivar. Ester associations include red berry fruits – mulberry, strawberry and occasionally raspberry. Bramble, spice and cloves add to a multi-layered nose. A young Pinotage has ripe fruit on the palate, while older styles tend to lean more towards flavours of Pinot Noir. This wine is a cross-pollination of Pinot Noir and Cinsault (Hermitage).
